DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: An isolated polypeptide having phosphohydrolase activity comprising an enzymatically active fraction of SEQ ID NO:6 wherein said fragment comprises the species of amino acid residues 47-68, 123-138 167-187 or 193-214 of SEQ ID NO:6 as recited in claims 24. These species are distinct because each polypeptide fragment comprises a unique structure with distinct biochemical and biological functions.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 20 is generic.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
